 Tashkent, Uzbekistan

Citizenship: Uzbekistan

Work permit: Uzbekistan

Not ready to relocate; business trips — OK

Desired Position & Salary

Программист-стажер / Cybersecurity Intern / Junior Security Researcher

Specializations:

- Ethical Hacking
- Cybersecurity / Penetration Testing
- Programmer / Developer

Employment: Full-time

Schedule: Flexible

Desired commute time: Any

Education

2026 — Haad TC

Training Center

2025 — Astrum IT Academy

Frontend Development (completed program)

Cybersecurity & Security Skills

- **Linux**
- **Windows System Administration**
- **Ethical Hacking / Penetration Testing**

- **Networking:** TCP/IP, Routing, Scanning, Protocol Analysis
- **Scripting:** Bash, Python
- **PowerShell** (Basic)

Certifications

CRTA — Certified Red Team Analyst

Additional cybersecurity & scripting certificates available upon request.

Frontend Development Skills

- **Web Technologies:** React, Next.js, HTML5, CSS3, TailwindCSS, Bootstrap, etc.
 - **Programming:** JavaScript, TypeScript, Python
 - **Tools & Databases:** GitHub, SQL, Sass, Databases
-

Languages

- **Uzbek** — Native
 - **English** — C1
 - **Russian** — Beginner
-

About Me

I'm a cybersecurity-focused junior specialist with hands-on knowledge in ethical hacking, scripting, and system administration. I'm confident working with Linux, networks, and security tools, and I'm comfortable solving problems until the job is done — no excuses.

Frontend development gave me strong UI and JavaScript fundamentals, but I'm currently focused on security: understanding systems, finding weaknesses, automating tasks, and constantly improving my technical skill set.

I'm hungry to grow, ready for any task that pushes me forward, and never quit until I find a solution. I speak Uzbek, English (C1), and Russian, and I'm fully committed to building a strong career in cybersecurity.

I enjoy playing Elden Ring because it's all about self-growth, learning from mistakes, and pushing harder every time — same mindset I bring to work.
